ABOUT ME

- Motivated Computer Science undergraduate at SLIIT with a strong interest in software engineering, algorithms, and modern web development. Experienced in building academic and personal projects using technologies such as React, Spring Boot, and databases. Passionate about solving problems, learning new technologies and creating efficient digital solutions with real-world impact.

EDUCATION

BSc (Hons) in Computer Science 2024 - present
(Sri Lanka Institution of Engineering & Technology)

G.C.E.(Advanced Level) Examination 2019-2022
(Sir John Kothalawala College - Kurunegala)

- Chemistry C
- Physics C
- Combined mathematics C

G.C.E. (Ordinary Level) Examination 2008-2018
(Vijayaba National College Maho)

- A - 5
- B - 3
- S - 1

PROJETS

University Projects

Online Cab Service On going

- This website is designed to provide users with an easy and enjoyable way to explore different types of vehicles. Users can browse through various vehicle categories and view available vehicles with their names and images. The platform offers a simple, clean and responsive interface, making it easy for users to navigate and find the vehicles they are interested in. The goal of this website is to deliver a smooth and user-friendly browsing experience.

  - Database - MongoDB
  - Frontend - React JS
  - Backend - Java Spring Boost

SKILLS

- Project Leadership

Online sport shop

completed

- GenZsport is a modern online sports equipment store that offers premium gear for cricket, football, fitness, and indoor sports. It is designed to provide athletes and sports enthusiasts with high-quality products, fast delivery and expert support in one convenient place.

  - Database - MySQL
  - Frontend - React JS
  - Backend - Java Spring Boost

Personal Projects

Car Sale

completed

- This website is created to help users easily explore a variety of vehicle types in a simple and enjoyable way. It allows users to select different categories and view vehicles along with their names and images. The design is clean, responsive and user-friendly, ensuring smooth navigation throughout the site. The main purpose of this platform is to provide a convenient and pleasant vehicle browsing experience.

  - Database - MongoDB
  - Frontend - React JS
  - Backend - Java Spring Boost

Online Class Management

On going

- This web application was developed to streamline the management of mathematics classes for students from Grade 6 to Grade 11 by providing an organized and user-friendly platform. It enables students to easily view class schedules and access learning resources, while teachers can efficiently manage sessions by adding Zoom meeting links and YouTube video content. The system features a clean, responsive design that ensures smooth navigation across devices, with the main objective of enhancing the online learning experience through a centralized and accessible environment for both students and teachers.
